

AUSABLE BAYFIELD CONSERVATION  
AUTHORITY  
**SPRING 2010**  
**TREE PLANTING PROGRAM**

The Ausable Bayfield Conservation Authority (ABCA) sells native trees and shrubs to watershed landowners for conservation projects such as windbreaks, watercourse buffers and reforestation of erosion prone slopes or other marginal agricultural lands.

Grants are available for many projects through federal, provincial and local cost-share programs.

***Depending on your project you may be eligible for grants to cover up to 100% of the cash costs of your project.*** Projects ineligible for grants will be responsible for the full cost, as shown on this order form. Please contact us for more information.

ABCA provides the following planting services for trees purchased from us:

- \$0.45 per seedling for machine planting and \$0.60 per seedling for hand planting
- \$0.25 per seedling for herbicide application around seedlings
- \$5.00 per tree for planting large stock 2' ball and burlap or 4' bare root trees
- \$0.60 per tree for herbicide application around large stock
- \$250 fee for preparation of a planting plan that includes administrative costs associated with grant applications and site supervision during planting

Planting services are available to watershed residents only. There is no minimum acreage required to participate in the program, however a minimum fee of \$500 applies to sites less than 800 trees (~1 acre).

#### **Planting Stock:**

Trees are ordered from private nurseries to offer to watershed residents. Prices shown on the order form that follows include transportation of trees to Exeter, cold storage and handling.

Trees are grown from locally sourced seed where possible. Species availability is dependent on previous years' natural seed crop and so supply varies annually.

For more information about the tree planting program and applicable cost share grants please contact:

***Thank you to the following grant program funding partners:***

*ABCA member municipalities, Huron and Middlesex Counties, Canada-Ontario Agreement, Government of Canada Habitat Stewardship Fund, Trees Ontario, Province of Ontario.*

**IMPORTANT SPRING 2010 ORDER DEADLINES**  
**Mail-in orders must be received by January 31, 2010.**  
**An invoice will be mailed to you (payment due February 28).**  
**Over-the-counter orders are due with payment by Friday, February 26, 2010.**

**Plant the right tree on the right site!**  
*These guidelines are general recommendations only.*  
*Many factors affect site suitability.*  
**Please contact us for advice specific to your site.**

	mature height	soil	moisture	shade tolerance	comments
<b>Conifers</b>					
white cedar	to 50'	sand/loam/clay	best on moist sites	sun/part shade	often used for windbreaks, moderate growth when young, growth slows with age, will grow in eroded soils
white pine	100' +	sand/loam/silt loam	well drained	sun/part shade	used in reforestation to initiate succession to hardwoods, susceptible to salt damage
Norway spruce	100'+	sandy /loam	well drained	sun/part shade	good windbreak tree, this is the large spruce one often sees along farm lanes
white spruce	to 80'	sand/loam/clay	moist to well drained	sun/part shade	good windbreak tree, tolerates heavy soils
blue spruce	to 50'	sand/loam/silt loam	well drained	sun/part shade	drought tolerant once established
tamarack	to 60'	organic(muck)/loam	best on moist sites	full sun	fast grower; graceful; shallow roots; loses needles in winter, native larch
Austrian pine	to 60'	sand/loam/clay	well drained	full sun	tolerates salt, drought, therefore used extensively along roadsides and urban situations
<b>Deciduous</b>					
silver maple	to 100'	sand/loam/clay	well to poorly drained	full sun	good trees for moist sites but will also grow on upland sites
sugar maple	to 80'	sand loam to clay	well drained	shade/part shade	important for wildlife, maple syrup production and timber, requires protection from rodents, rabbits and deer
red oak	to 100'	sand/loam/clay	well drained	full sun	good wildlife species, seedlings require protection from rodents, rabbits and deer
bur oak	to 100'	sand/loam/clay	well to imperfect	full sun	good wildlife value, drought tolerant once established, seedlings require protection from rodents, rabbits and deer
black walnut	to 100'	loam/clay	well drained	full sun	best growth achieved on deep, well drained loams, of river floodplains or lower slopes, more resistant to rodents and deer than most other hardwoods
black cherry	to 80'	loam	well drained	full sun	best growth achieved on deep, well drained loams, fast growth in full sun, protect from deer and rabbits
<b>Shrubs</b>					
red osier dogwood	to 10'	sand/loam/clay	poorly drained	full sun	white flowers with white fruit, tolerates a wide variety of soils and drainage from moist to well drained
nannyberry viburnum	to 15'	sand/loam/clay	well to poorly drained	full sun	cream flowers and dark purple fruit
staghorn sumac	to 15'	sand/loam/clay	well drained	full sun	red fruiting clusters remain on shrub into winter, spreads from root sprouts to form colonies, excellent for erosion control on slopes, tolerates poor soil
Contact Pinery Provincial Park at 1-519-243-8574 to order dune grass for erosion control projects on sandy sites.					

# ABCA SPRING 2010 TREE PLANTING PROGRAM ORDER FORM

**Mail in orders must be received by January 31, 2010. An invoice will be mailed to you. Payment must be received by our office no later than February 28, 2010 to guarantee your order.**

<b>SEEDLINGS</b>		seedlings must be ordered in multiples of 10; minimum order 100 seedlings				
		Price		Quantity	Product Code	Amount
<b>Conifers</b>						
white cedar	*example*	\$1.20	4	x 10 =	40	
white cedar	bare root ~ 8"-16"	\$1.20		x 10 =		7510-Ce4BR
white pine	bare root ~ 8" - 10"	\$1.00		x 10 =		7510-Pw3BR

## AUSABLE BAYFIELD CONSERVATION AUTHORITY SPRING 2010 TREE PLANTING PROGRAM - CUSTOMER INFORMATION

Return this form to the ABCA Administration Office at:

71108 Morrison Line, R. R. #3  
Exeter, Ontario N0M 1S5

- Phone 519-235-2610 or 1-888-286-2610
- Fax 519-235-1963

**Mail-in orders must be received by January 31, 2010. An invoice will be mailed to you; payment must be received by our office no later than February 28, 2010, to guarantee your order.** Orders may be placed in person, accompanied by payment, at the ABCA office until 4 p.m. on Friday, February 26, 2010.

### CONDITIONS

1. Trees must be ordered in multiples of 10. The minimum order is 100 seedlings or 20 large stock.
2. Orders not filled due to events beyond the ABCA's control will be refunded.
3. Customers must pick trees up at the ABCA Administration office 2 km east of Exeter at scheduled times within 7 days of being notified. Customers are notified of pick-up times using the phone # provided below.
4. Trees purchased through this program are to be used for afforestation, erosion control, and other stewardship projects, not landscaping.
5. Trees are not to be cut, harvested or otherwise removed from the planting area for a minimum of 15 years after planting.
6. The ABCA takes no responsibility for the failure of the stock provided but will take all reasonable precaution to ensure the trees are received in the best possible condition.
7. The landowner agrees to provide protection from grazing, rodents and other damaging agents.

### CUSTOMER INFORMATION

*Personal information on this form is collected under the authority of the Conservation Authorities Act Section 21, and will be used to determine eligibility for the Afforestation Program.*

Name (first & last): \_\_\_\_\_

Business/Farm Name: \_\_\_\_\_
